BRIGHTECH

The Bruce Table Lamp

ASSEMBLY

1. Screw the bulb (part B) into the socket.
2. Screw the glass shade (part C) onto the base (part A), taking care not to overtighten, as this can cause the shade to crack or not enable it to be screwed back off in the future.
3. Plug the cord into a 110v outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER & DIMMING : To turn the lamp on, rotate the switch located on the lamp's cord. Adjust the switch to your desired brightness level. To turn it off, simply slide the switch to the off position.

SAFETY & WARNINGS

This product uses a polarized plug so one prong is larger than the other. When plugging into an outlet, take care to plug the correct direction to avoid electric shock.

This product is intended for 110v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below fo some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.
Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. However any parts that are connected to other parts by wiring are considered one full piece as a unit.

Light not Working: If the bulb is not working, the metal tab in the socket might have pushed in too much during production. Try unplugging the lamp and pulling out the tab slightly, to help create a connection between the two. If this doesn't fix the problem, we recommend trying to swap with another bulb. If the new bulb doesn't fix the issue, the lamp might be defective.

SPECIFICATIONS

Bulb Wattage | 5 watts
Color Temperature | 2700 kelvin
Brightness | 550 lumens
Bulb Specs | E26 Base / ST58 Shape
Max Wattage of the Socket | 60 watts
