BRIGHTECH

The Cleo Table Lamp

ASSEMBLY

1. Screw off the socket ring (part C) from the lamp's socket.
2. Slide the shade over the socket, and then fasten the shade (part B) onto the lamp by re-fastening the socket ring onto the socket.
3. Screw in the bulb.
4. Plug the cord from the lamp into the power adapter plug (part E).
5. Plug the cord into a US outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER & DIMMING : To turn the lamp on, rotate the switch located on the lamp's cord. Adjust the switch to your desired brightness level.

CUSTOMIZING THE BULB : This lamp's controls out of the box are and ideal for a host of lighting environments. If desired however, this bulb may be swapped out for a different bulb, including a dimming and/or color-changing smart bulb to increase customizability. Bulb specifications should not exceed the maximums represented in the Specifications on the reverse side of this page.

USING WITH A WALL SWITCH : To use the lamp with a wall switch, simply plug it into an outlet that is built to be powered by the wall switch, and then slide the power to On. The lamp will then be able to be turned on and off via the switch, but the dimming needs to be controlled via the power controls on the cord of the lamp.

SAFETY & WARNINGS

This product is intended for 120v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below fo some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.
Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. However any parts that are connected to other parts by wiring are considered one full piece as a unit.

Light Flashing or Strobing: A malfunction of this sort may suggest a problem with the power adapter cord, necessitating a replacement of this cord.

Light Dim or Dead: If the LEDs have dimmed, or the lamp has failed after first not performing at max brightness, this may suggest a failure of the actual LED component, necessitating a replacement of the bulb. Note - this lamp does not use a traditional 110v bulb and can only take a 12v bulb.

SPECIFICATIONS

Bulb Wattage | 4 watts
Bulb Shape | G45
Bulb Color Temperature | 2700 kelvin
Bulb Brightness | 240 lumens
Socket Voltage | 12v (cannot take a 110v bulb)
Socket Specs | E26 / Max 12 watts
Adapter Specs | Input AC100-240v | Output 12v, 1.5A
