## OPERATION & USE

POWER & DIMMING: The touch-sensor On/Off switch is located directly on the head of the lamp. Simply tap lightly to turn on. To dim the lamp or to turn it off, tap the power button again. The lamp will first cycle through two dimmer brightness levels, and on the third tap, it will shut off.

WIRELESS CHARGING: To wirelessly charge your device, simply lay the device in the center of the circular wireless charging pad on the lamp's base. Wireless charger will not charge device if there is metal in it or in its case. To confirm charging, check your device to make sure that it is registered as recognizing the charge. Note: The charging pad will not charge devices that are not built to be compatible with wireless charging.

## SAFETY & WARNINGS

This product is intended for 110v voltage only. Use with a higher voltage is likely to cause damage.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F - 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for modifications to this product or any of its electrical components, or for use with externally purchased parts not manufactured to come with this product.

## FURTHER RESOURCES | Diagnosis

Thanks to our great track-record with these lights, reported problems have been few and far in-between. But we know, sometimes things can happen. If your product is experiencing any abnormalities, please see below for some more insight as to what may be happening & if there's anything you can do to troubleshoot.

**Note: Never make any temporary or permanent alterations to any parts or components of this product.**

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. The head, body, and base of this lamp are fully wired together and are considered one piece.

Replacing the Lights or Wiring: The LEDs and wiring are built directly in to the lamp for maximum durability and are non-replaceable at this time.
