BRIGHTECH

The Leon Table Lamp

ASSEMBLY

1. Unscrew the socket ring (part B) from the socket.
2. Place the shade's ring (part C) onto the socket, and then tighten the shade onto the socket by screwing the socket ring back onto the socket until tight.
3. Screw the bulb (part A) onto the socket.
4. Plug the cord into a US outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER & DIMMING : To turn the lamp On or Off, simply turn the flip on the cord of the lamp.

USING WITH A WALL SWITCH & SMART PLUG: To use this lamp with a wall switch, simply plug it into an outlet that is built to be powered with the wall switch, and turn the lamp On via the power switch. The lamp will then be able to be turned on and off via the light switch. Similarly, to use with a smart plug, plug the lamp into your smart plug, turn the lamp to On, and then you can use your smart controls to turn the lamp On or Off.

Note: Brightness level cannot be adjusted externally as the bulb is not dimmable.

CUSTOMIZING THE BULB : This lamp's controls out of the box are on/off and the 5-watt bulbs that emit a warm white light at 2700 Kelvin, which is ideal for a host of lighting environments. If desired, this bulb may be swapped out for a different bulb, such as a dimming and/or color-changing smart bulb, however plase note that the base size of this lamp's socket is E12 and the wattage should not exceed 40w.

SAFETY & WARNINGS

This product is intended for 120v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

CLEANING & CARE

Dust often using a clean, soft, dry and lint-free cloth.

Blot spills and wipe with a clean, damp cloth immediately.

We do not recommend the use of chemical cleansers, abrasives or furniture polish as this can damage the laquered finish.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below fo some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.
Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. However any parts that are connected to other parts by wiring are considered one full piece as a unit.

Light not Working: If the bulb is not working, the metal tab in the socket might have pushed in too much during production. Try unplugging the lamp and pulling out the tab slightly, to help create a connection between the two. If this doesn't fix the problem, we recommend trying to swap with another bulb. If the new bulb doesn't fix the issue, the lamp might be defective.

SPECIFICATIONS

Bulb Wattage | 5 watts
Bulb Shape | G16.5
Bulb Color Temperature | 2700 kelvin
Bulb Brightness | 350 lumens
Socket Voltage | 120v
Socket Base Size | E12
Max Wattage | Max 40 watts
