BRIGHTECH

The Mushroom Table Lamp

ASSEMBLY

1. No assembly is required. This lamp comes preassembled in the box, including with the bulb already in place in the socket.
2. Plug the cord into your 110v outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER : The power control is located on the cord of the lamp, in the form of a flip switch. Simply flip the switch to turn the lamp on and off.

USING WITH A WALL SWITCH OR SMART PLUG: To use this lamp with a wall switch or smart plug, simply plug it into an outlet that is built to be powered with the wall switch, or into your smart plug. Switch the lamp to On via the power cord, and leave at On. The lamp will now be able to be turned off and back on via your wall switch or smart plug controls.
Note: Dimming cannot be controlled via light switch or smart controls.

REPLACING THE BULB : To release the bulb, turn the lamp over gently on a non-scratch surface, and then loosen the socket attachment by twisting the plastic cord connection at the base of the lamp. Once loose, you'll be able to gently pull the socket rod out, enabling you to exchange for your desired bulb. Once bulb is exchanged, you can slide the rod back into the lamp and retighten the cord connection. Note: Do not exceed the socket's maximum wattage or use a bulb larger than the included one, which will risk damage to the lamp.

SAFETY & WARNINGS

This product uses a polarized plug so one prong is larger than the other. When plugging into an outlet, take care to plug the correct direction to avoid electric shock.

This product is intended for 110v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below fo some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.
Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: For convenience, this lamp is manufactured as on single unit, with no removable parts aside from the bulb. If there is cosmetic damage to the body or the wiring, therefore, there are no replaceable parts and the whole unit will need to be replaced.

Light not Working: If the bulb is not working, the metal tab in the socket might have pushed in too much during production. Try unplugging the lamp and pulling out the tab slightly, to help create a connection between the two. If this doesn't fix the problem, we recommend trying to swap with another bulb. If the new bulb doesn't fix the issue, the lamp might be defective.

SPECIFICATIONS

Bulb Wattage | 5 watts
Bulb Color Temperature | 2700 kelvin
Bulb Shape & Base | ST19 shape / E26 base
Bulb Brightness | 500 lumens
Max Wattage of the Socket | 40 watts
