BRIGHTECH

The Sansa Table Lamp

ASSEMBLY

1. Unscrew the socket ring (part C) from the socket.
2. Screw the LED (part D) into the socket.
3. Place the shade (part B) onto the socket, and secure onto the lamp by screwing the socket ring back onto the socket, over the shade.
4. Plug the power adapter cord (part E) into the lamp's cord.
5. Plug the cord into a 120v outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER & DIMMING : To turn the lamp on, rotate the switch located on the lamp's cord. Adjust the switch to your desired brightness level.

USING WITH A WALL SWITCH : To use the lamp with a wall switch, simply plug it into an outlet that is built to be powered by the wall switch, and then slide the power to On. The lamp will then be able to be turned on and off via the switch, but the dimming needs to be controlled via the power button on the body of the lamp.

SAFETY & WARNINGS

This product uses a polarized plug so one prong is larger than the other. When plugging into an outlet, take care to plug the correct direction to avoid electric shock.

This product is intended for 120v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below fo some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.
Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. However any parts that are connected to other parts by wiring are considered one full piece as a unit.

Light Flashing or Strobing: A malfunction of this sort may suggest a problem with the power adapter cord, necessitating a replacement of this cord.

Lights Dim: If the LEDs have dimmed, or the lamp has failed after first not performing at max brightness, this may suggest a failure of the actual LED component, necessitating a replacement of the LED.

SPECIFICATIONS

Bulb Wattage | 5 watts
Bulb Voltage | 12v (cannot be replaced with a 120v bulb)
Color Temperature | 2700 kelvin
Brightness | 550 lumens
Socket Specs | E12 / Max 9W
Adapter | Input AC100-240v
| Output 12v, 1A
